

MBB SERIES

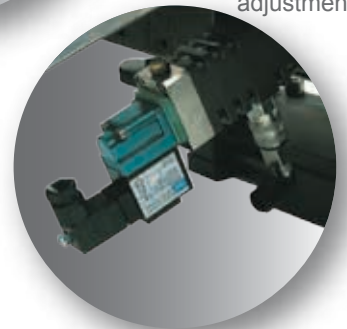

Bookbinding Spine Gluing Applications up to 60 mm

The Valco Melton MBB Series is the best option for spine-glue binding applications, offering precise and easy adjustment in a limited space. The MBB Bookbinding System applies adhesive directly to the book spine. It maintains accurate coating thickness, important with delicate PUR glues to increase overall production. Adhesive waste levels are ultimately decreased by replacing traditional open-wheel technologies. Improved application onto the paper fibers increases adhesion that improves lay-flat properties and important high-pull values. A complete system from one supplier using our industry standard compatible parts allows for easy integration into existing systems when you need it.

- Easy width adjustment up to 60 mm
- Pneumatic pressure regulation
- Suitable for PUR / EVA adhesives
- Optional filter

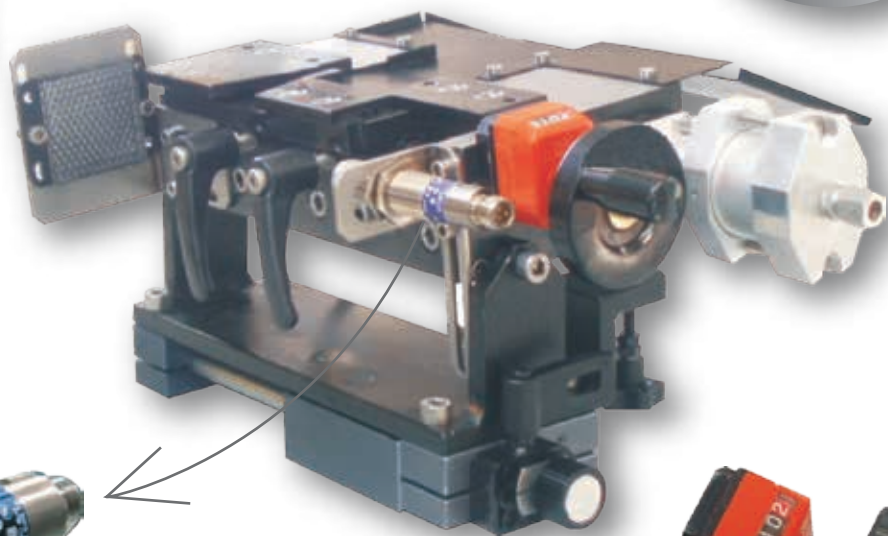

Independent pneumatic pressure regulation

Versatile bracket provides horizontal and angular adjustment

The MBB Series Snuffback Module is optimized to provide clean cut-off

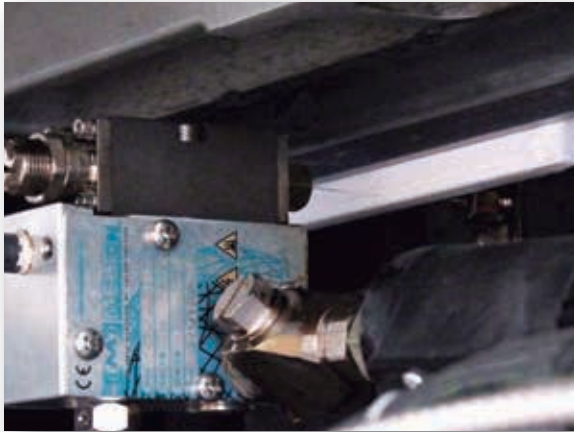

Photoelectric sensor provides precise application with minimum adhesive waste

Easy hand adjustment offers ultimate precision up to 60mm in width

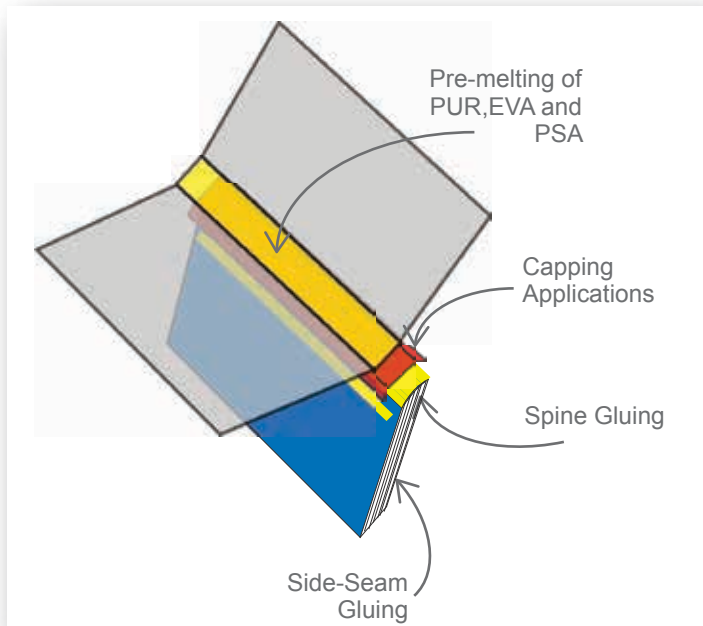

Applicators can be mounted to apply the adhesive to the book block (as shown) or to the cover feeder.

Valco Melton products offer a wide range of equipment solutions for side glue application. Whether contact or non-contact, electric or pneumatic guns, book block or a cover feeder application, Valco Melton has a solution to meet your specific needs.

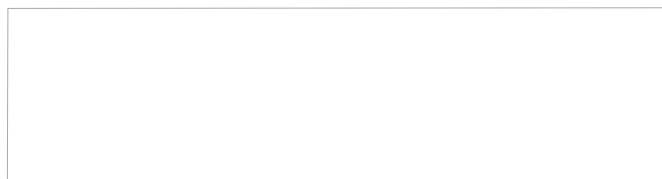

- Contact or Non-Contact systems for book block or cover-feed gluing
- Bracket installation for quick change-outs and added precision placement

Additional Bookbinding Features

We offer a number of drum melters specifically created for unique PUR and EVA adhesive needs, perfect for high-quantity adhesive dispensing and precise application on continuous jobs. Finned, flat, and axial platens are all available for maximized melting capabilities. With a number of specific equipment options and double system operation capabilities, we offer a range of solutions to support a variety of customer needs. A wide selection of standard hot melt units are also available.

Valco Melton products also offer permanent and removable tipping attachments for publications using compact and modular designs for added ease-of-use on in-line and off-line tipping applications
